

# István Gates

3480 Kent Road, Stow, Ohio 44224, USA  
ig11@zips.uakron.edu • +1 (330) 931-8770 • <http://www.github.com/gatesyp>

## EDUCATION

### The University of Akron, Akron, Ohio, USA

- Double Major (Bachelor's) in Computer Science and Applied Mathematics Aug 2014 – Present  
(expected graduation of Fall 2019)
  - GPA: 3.19

## WORK EXPERIENCE

### Complex Engineering Systems Lab (CESL), University of Akron

- Undergraduate Research Student May 2015 – Aug 2015
  - Project: Motivational Interviewing Expert Systems Development
  - Supervisors: Dr Shivakumar Sastry and Mr Prasad Fernando
  - Research areas: Developed content organization tool as well as visualizer (content specified by Masters student). Defined and organized question-response links in order to create dynamic "interview". Extensive work in PHP and SQL/MySQL.

## PROJECTS

- twiddit Jan 2016
  - Programmed using Python.
  - Create a personalized 'reddit.com' account based off of a twitter profile.
  - Using Twitter RESTful API, collect all tweets from a user
  - Using IBM Alchemy sentiment analysis API, a user's likes and dislikes are discovered. Related 'subreddits' are found and subscribed to.
  - 'reddit' account details are sent to the user's twitter profile.
- BitTorrent Client Jan 2016 – Present
  - Programming using C and CMake
  - Currently developing BitTorrent application for future project use and for learning about P2P sharing and computer networking.
  - Follows BitTorrent protocol as specified by official documentation to serve as fully functioning client.
- BARNRAISR Dec 2015
  - Programmed using PHP and MySQL.
  - Android application to increase number of volunteers in a local community.
  - Developed back-end web server and database.
  - Provides on demand, location based volunteer opportunities which are created by users.
  - Server supports creation of events, checking in to events, refreshing event list, and user profile operations.
- MEDIQR Nov 2015
  - Programmed using Java.
  - Helped developed software to read live stream of QR codes and output to formatted HTML file.
  - Android application to decrease patient wait times in Emergency Rooms.
  - User fills out personal information on Android application which is encoded to QR codes and saved to their phone.
  - When entering an ER, the QR codes are flashed to a webcam. Live video stream is read and interpreted.
  - Results in increased patient-turnover rates by massively decreasing the time needed when collecting patient data for the first time.

## AWARDS

- Grand Finalist, Hyland Hackathon, West Lake, Cleveland Dec 2015
  - Out of 127 total participants. With project BARNRAISR
- Top 10 Finalist, OH/IO Hackathon, Columbus Nov 2015
  - Out of 550 participants. With project MEDIQR

## CAMPUS ACTIVITIES

### IEEE Student Chapter, University of Akron

- President Sep 2015 – Present
  - Refactored student chapter.
  - Grew membership from 8 to 45 students.
  - Created and managing 2 IEEE-Funded project design teams (12 students per team).
  - Secured sponsorship from University of Akron Honor's College.
  - Resolved multiple internal conflicts in order to reorganize student chapter.
- Secretary Nov 2014 – Sep 2015
  - Planned all meetings.
  - Scheduled speakers.
